This Credentialing Achievement Record (CAR) is the official training and performance document for the above named NIMS credentialing candidate. The CAR is used by the trainer/supervisor and candidate as a record (or log book) of individual on-the-job performance. The CAR is the *vehicle* that will allow eligible candidates to take the NIMS written credentialing examination(s). Supervisors, trainers, and candidates should take care of this record and be sure that it is accurate, kept up to date, filled out correctly, and properly stored. All information recorded in the CAR should be considered **CONFIDENTIAL**.

Candidates may select as many credentialing Duty Clusters as applicable to the facility or appropriate to the job. There are separate CAR booklets for each credentialing Duty Cluster. The CAR opens with list of Critical Work Activities (or experience statements) that must be acknowledged and documented. However, actual performance is assessed two ways:

1) by fulfilling these general experience and historical statements and 2) by an examiner administering *Skill Checks* (or performance assessments). Five successful Skill Check attempts are required. Skill Checks are clearly marked with the title - CAR SKILL CHECK. Candidate performance is documented by a ☑ on the Examiner's CHECKLIST. All Skill Checks must be co-signed and dated by the trainer/supervisor and candidate. Work Activity sign-offs must be co-initialed by the trainer/supervisor or manager and candidate then dated. If a particular Skill Check step or standard does not apply at your facility, check-off the applicable NA box and continue. Skill Checks may require the candidate to perform work a bit differently than your normal procedure or learn how to do something that may not be part of their typical day-to-day responsibilities. However, you may only check-off NA if the process-standard does not apply because the equipment or tooling is not available or the stamping process itself does not require this activity.

For additional information about administering CAR Skill Checks, see the \underline{CAR} Administration \underline{Guide} or consult with your facility Credentialing Coordinator.

METAL STAMPING CREDENTIALING PROGRAM

LEVEL II CREDENTIALING ACHIEVEMENT RECORD (CAR)

Operate Equipment with Deep Drawing Dies DUTY CLUSTER 2.12-14

Duty Cluster and Critical Work Activities	Date Completed	Supervisor Initials	Trainer Initials	Trainee Initials
Operate Deep Drawing Equipment	Completed	Initials	Include	Interes
Candidate has successfully completed all required safety training/courses as specified by the work facility or required by OHSA. Candidate has working knowledge of applicable OHSA and ANSI regulations and guidelines.				
Candidate has successfully completed the probationary period for this job as specified by the work facility.				
Candidate demonstrated the ability to recognize and explain the type of press and its function (including controls, mechanical devices, die components, and auxiliaries if applicable).				
Candidate has demonstrated working knowledge of material/part conformance standards and basic SPC recording techniques.				
Candidate has met the attendance policy of the facility for the last 12 consecutive months.				
Candidate has no company documented safety violations within the last 12 consecutive months.				
Candidate was able to recognize common equipment problems and adverse material conditions.				
Candidate has no reported incidents of non-conforming parts contaminating quality parts over the last three (3) consecutive months.				
Candidate has demonstrated the ability to maintain a clean and orderly work area in compliance with facility housekeeping policies and has no reported violations for a period of three (3) consecutive months.				
Candidate has basic understanding and knowledge of the types of operations performed in metal stamping such as coining, embossing, forming, blanking, piercing, and deep drawing dies (single, double, and/or reverse).				

CAR SKILL CHECK

Candidate: Registration No.:	Date:	199
Examiner: Examiner No.:	(For official use only) Results (check one): Pass	s □ Yes □ No

Work Activity

2.12-14 - Operate Equipment with Drawing Dies

Performance Conditions

Setting: OJT Observation #1a - Shop/plant floor equipped with deep drawing dies (single, double or reverse). Given a setup in production using deep draw dies that have already been verified for safety (including auxiliaries), produce parts according to a Process/Quality Plan. Candidate will re-start equipment, cycle/jog machine, verify and document part conformance, produce parts while continuously monitoring equipment, re-load material, and shut-down equipment. Candidate is not responsible for major troubleshooting. However, candidate must be able to recognize adverse conditions, equipment problems, and non-conformance situations and respond accordingly. Processes and standards presented in this Skill Check are applicable to all required attempts

(5 successful observations required).

Note:

If running a coil fed operation, candidate must also complete Skill Check b - Operate Auxiliary Equipment to be credentialed in this Duty Cluster.

Safety Equipment:

PPE/PPC

Tools, Equipment and Materials:

- Part Placement Equipment (tongs, suction cups, magnets, etc.)
- Die Bar
- Probe
- Stone
- Flashlight and Mirror
- Blow Gun/Vacuum
- Attribute Gages and Fixtures
- Pen/Pencil (calculator optional)
- Process/Quality Plan/SPC
- Lubricating Devices (if needed)
- Lubricants/Coolants (as needed)
- **Part Containers**
- **Scrap Containers**

Measuring Instruments:

- **Calipers**
- Micrometers
- Scales/Tape Measure
- Height Gages
- **Specialty Gages**
- **Protractor**

Attainment Standards

- 1. 100% of all procedural steps and standards, without assistance, within company-specific time limit, following all safety and plant procedures.
- 2. 100% conformance with all product standards and Process Plan criteria.

Trainee Directions

The above referenced tools, equipment, materials and supplies will be used to Operate Equipment with Deep-Drawing Dies. All safety and plant procedures must be followed. Both the process and final result of the process will be evaluated by the examiner. Steps should be performed in the sequence, and all steps must meet the standards for successful completion.

Examiner Instructions

For successful completion of this Skill Check, the candidate must demonstrate the ability to successfully complete the work activity under controlled assessment conditions. All work must be completed to standard. Before administering the Skill Check:

- Read/review the *CAR Administration Guide* developed for the program.
- Ensure that you have a copy of this Skill Check for the candidate to use while he/she is working. Be sure all applicable equipment and supplies are available.

Do <u>not</u> provide assistance during the Skill Check. Monitor work in-progress and evaluate for *process*. Assess the completed work for conformance with **product** criteria. Mark *NA* if a process/product is not appropriate.

Stop the Skill Check immediately if the candidate violates a safety regulation or procedure or if there is any possibility of personal injury or damage to equipment.

Before testing, the examiner may discuss appropriate safety requirements and loss potential issues (i.e., Lock and Tag/Zero Energy, HAZMAT, personal protection equipment, pinch points, compressed gas/air, high voltage).

EXAMINER: Read aloud the *Skill Check Script* from the *CAR Administration Guide* (*verbatim*).

When the candidate indicates that he/she has completed the Skill Check or when maximum time allowed has run out, assess final product and follow the closing procedures outlined in the *CAR Administration Guide*.

Checklist

Scoring Procedures: Observe the candidate's performance for each Process Element and mark the *CHECKLIST* whether or not the standards were attained (*Do not rely on your memory*). Steps on the process side are to be marked as they are initiated. Standards are to be marked after each step has been competed.

(C) *Critical*. Failure to meet the standard will result in Skill Check termination.

Note: The evaluator will terminate the assessment and schedule the individual for further training.

Examiner's CHECKLIST — CAR SKILL CHECK #1

Operate Equipment with Deep Drawing Dies

Process Elem	ents		Process-Product Standards			
Steps	Yes	No		Yes	No	NA
⇒ Drawing Dies						
1. Inspect Work Site and Prepare			PPE/PPC appropriate for job. (c)Obtained and read Process/Quality Plan.			
Station			 Status of material, press, auxiliaries, and package containers checked for availability and/or function. Work area clean and free of debris and obstructions. Die(s) and assemblies checked for function. 	000		
			 Safety systems verified (guards secure/active, control lights functional, alarms operational, etc.). (c) Inspection gages calibrated and tools/equipment and materials staged for production. 	٦		
			<u> </u>			
2. Start/Re-Start Equipment			 Auxiliaries, motors, press and systems energized. Press and auxiliaries adjusted and running safely (no abnormal odors, sounds, vibrations, or leakage). 			
			Proper Mode of Operation verified or selected according to Process/Quality Plan. (c)			
			Lubricants/coolants checked (filled as needed).			
			Sufficient stock verified for production.			
			Sensors/probes operational/verified for function.			
			• Equipment stations checked for service items; equipment functioning properly ("jog" ready).		.	_
3. Cycle or Jog			• Stock and/or die lubricated as per Process Plan. (c)			
Press and Make a Piece-Part or Container			 Tonnage and pad/cushion pressure within Process Plan specifications. Machine cycled/jogged (inch mode) and first piece 			
Container			part/container produced by for inspection.			
			Identified and responded to problems.			
4. Inspect Part/Container and			 Part/container safely removed from guarded area. Attributes visually checked for quality 			
Prepare for Production			characteristics as per Process/Quality Plan criteria (no cracks, galling, wrinkles, tears, etc.). Part/container dimensions/variables accurately			٥
			 obtained, verified and recorded as per Process/Quality Plan. Achieved part/container conformance within dimensional (+/-) tolerances, SPC control limits and 	٠		
			quality standards. (c)Materials staged for continuous production run.			
			 Materials staged for continuous production run. Equipment and tooling production-ready. (c) 			
			, r			

Skill Check continued	eck continued Process-Product Stand		Process-Product Standards	Yes	No	NA
5. Produce Parts/Containers Using Equipment with Drawing Dies (one hour operation time required)			 Attentively monitored process (pressures, lubricant/coolant levels, material inputs, sensors, air cushion, draw ring, tooling, outputs, system variations, etc.). Identified and responded to problems. Identified defective or non-compliance parts/containers without contaminating quality parts/containers discharged or packaged. (c) Equipment functioning properly and parts/containers produced within % productivity 	0	0	0
			 standards. Quality parts/containers produced and periodically tested (i.e., magnaflux, container pressure tests) on an on-going and continuous basis. Removed and segregated any scrap/all-fall. 			
6. Re-Load – Walk Strip Through Die For Coil Fed Re-Load, see Skill Check b, Operate Auxiliary Equipment			 No broken components present. (c) Equipment successfully stroked/jogged. Blanks loaded and correctly positioned in magazine or sufficient strip material loaded and readied for production. (c) Part/container or piece produced and inspected for conformance. 		00 0	
7. Shut Down Press and Auxiliaries			 Reload completed; strip ready. Process stopped. Equipment de-energized or at-rest. (c) Equipment stations checked for service items Area clean or prepared for hand-off. 			

FINAL PRODUCT STANDARDS

"Work	is Do	one As Expected When:"
a.	_	Job was performed accurately according to job Process/Quality Plan or SOP.
b.		Finished parts/containers or pieces meet customer expectations, requirements, and needs.
C.		Scrap managed and segregated, good parts identified and contained, and quality parts/containers continuously produced according to (%) productivity standards.
d.		Candidate demonstrated ability to collect data, notice production inconsistencies, and link cause and effect to identify simple problems and make process improvements.
e.		Candidate addressed quality or equipment problems decisively by evaluating multi- dimensional situations and responded accordingly.
f.		Area clean and organized. All safety/plant procedures have been followed.

2.12-2.14 - CAR SKILL CHECK SUMMARY

Critical Work Activities and Skill Checks Completed	Date Completed			
Operate Equipment with Deep Drawing Dies				
Successful Skill Check Attempt #1				
Successful Skill Check Attempt #2				
Successful Skill Check Attempt #3				
Successful Skill Check Attempt #4				
Successful Skill Check Attempt #5				

Skill Check b - Operate Auxiliary Equipment (Coil-Fed)

DUTY CLUSTER 2.1-2.6

Critical Work Activities & Experience	Date Completed	Supervisor Initials	Trainer Initials	Trainee Initials
Auxiliary Orientation and Walkthrough				
Operate Auxiliary Equipment				_
Candidate demonstrated ability to recognize and explain the function of equipment used in material feed (manual feed and coil fed), payout, and part/scrap removal.				
Candidate has no company documented safety violations within the last 12 consecutive months.				
Candidate has consistently been able to meet the requirements pertaining to auxiliary equipment as specified in Process/Quality Plans and supportive Standard Operating Procedures or operations/equipment manuals.				
Candidate able to recognize common adverse material conditions (i.e., camber, crowning, edge roll, cross-bow, coil break, rust, surface lamination, etc.).				

Skill Checks begin on next page

CAR SKILL CHECK "b"

Candidate: Registration No.:	Date: 199
Examiner: Examiner No.:	(For examiner use after all Skill Check have been administered) Results (check one): Pass Yes No

Work Activity

2.1-2.6 - Reload, Adjust and Operate Coil-Fed Auxiliaries

Performance Conditions

Setting:

OJT Observation b - **Reload a Coil**. Candidate will obtain tools/equipment and materials; reload raw material into production (Note: The previous coil/strip has already been taken out of the feeder and die), and operate auxiliaries (includes: adjust uncoiler/feeder, straightener, stock reel/cradle, take-ups, and payouts/unloaders). Processes and standards presented in this Skill Check are applicable to all required attempts (5 Skill Checks required).

Safety Equipment:

PPE/PPC

Tools, Equipment and Materials:

- Common Hand Tools
- Wrenches (Hex, Adjustable, Box and Open-ended)
- Flashlight
- Mirror
- Locking pliers
- Die bar
- Screw driver set
- Calculator
- Part Placement Devices

- Crane or Forklift (if needed)
- Stock (coil, or strip)
- Process/Quality Plan

Measuring Instruments:

- Ruler/Tape Measure
- Micrometers
- Calipers
- Square

Attainment Standards

- 1. 100% of all procedural steps and standards, without assistance, within company-specific time limits, following all safety and plant procedures.
- 2. 100% conformance with product standards and Process Plan criteria.

Trainee Directions

The above referenced tools, equipment, materials and supplies may be used to Operate and Adjust Auxiliary Equipment. All safety and plant procedures must be followed. Both the process and the final results of the process will be evaluated by the examiner. Steps should be performed in the sequence, and all steps must meet the standards for successful completion.

Examiner Instructions

For successful completion of this Skill Check, the candidate must demonstrate the ability to successfully complete the work activity under controlled assessment conditions. All work must be completed to standard. Before administering the Skill Check:

- Read/review the *CAR Administration Guide* developed for the program.
- Ensure that you have a copy of this Skill Check for the candidate to use while he/she is working and be sure that all applicable equipment and supplies are available.

Do <u>not</u> provide assistance during the Skill Check. Monitor work in-progress and evaluate for *process*. Assess the completed work for conformance with **product** criteria. Mark **NA** if a process/product is not appropriate.

Stop the Skill Check immediately if the candidate violates a safety regulation or procedure or if there is any possibility of personal injury or damage to equipment.

Before testing, the examiner may discuss appropriate safety requirements and loss potential issues (i.e., Lock and Tag, crane/forklift safety, personal protection equipment, confined space entry, compressed air, high voltage, E-Stops, etc.).

EXAMINER: Read aloud the Skill Check Script from the *CAR Administration Guide* (*verbatim*).

When the candidate indicates that he/she has completed the Skill Check or when maximum time allowed has run out, assess the final product and follow closing procedures outlined in the *CAR Administration Guide*.

Checklist

Scoring Procedures: Observe the candidate's performance for each Process Element and mark the *CHECKLIST* whether or not the standards were attained (*Do not rely on your memory*). Steps on the process side are to be marked as they are initiated. Standards are marked after each process step has been completed.

(C) *Critical*. Failure to meet the standard will result in Skill Check termination.

Note: The evaluator will terminate the assessment and schedule the individual for further training.

Examiner's CHECKLIST — CAR SKILL CHECK #1b Reload, Adjust and Operate Coil-Fed Auxiliaries

Facilities and the second seco	
Process Elements	Process Product Standards

RE-LOAD						
⇒ UNCOILER	Yes	No		Yes	No	NA
Request Raw Material Delivery			Donned/wearing required PPE (c).Followed job Process/Quality Plan.			
2. Verify Raw Material			 Compared inventory identification tags (customer, SO number, material ID, heat number, etc.). Recognized material type and any special conditions (i.e., clad, Teflon, galvanized, etc.). Removed and disposed paper coil covering. Verified to SOP/Quality Plan. 	0 000	0 000	0 000
3. Inspect Material			 Checked coil/strip visually for adverse material conditions (rust, surface lamination, coil break, telescoping, clock spring, etc.). Inspected as per SOP/Quality Plan. 		0 0	
4. Prepare Uncoiler and Load Stock			 Operated crane/forklift safely and efficiently (demonstrated rigging, positioning and distancing, pick-up technique, transport ability, etc.) (c). Load did not exceed rated capacity of crane or 		0	0
			 forklift. (c) Material secured to uncoiling/re-reeling device. Safely removed containing bands per SOP (c). Stock reel mandrels/coil keepers accepted ID of 			000
			stock.Stock cradle confining plates accepted width (or OD) of coil.			٦
			• Selected/verified Mode of Operation (manual) (c) .			
5. Advance Material			Utilized threading tables.			
			Material advanced up to next piece of equipment.			
6. Adjust Uncoiler			 Repositioned loop control device. Selected/verified Mode of Operation (auto) ©.
