This Credentialing Achievement Record (CAR) is the official training and performance document for the above named NIMS credentialing candidate. The CAR is used by the trainer/supervisor and candidate as a record (or log book) of individual on-the-job performance. The CAR is the vehicle that will allow eligible candidates to take the NIMS written credentialing examination(s). Supervisors, trainers, and candidates should take care of this record and be sure that it is accurate, kept up to date, filled out correctly, and properly stored. All information recorded in the CAR should be considered **CONFIDENTIAL**.

Candidates may select as many credentialing Duty Clusters as applicable to the facility or appropriate to the job. There are separate CAR booklets for each credentialing Duty Cluster. The CAR opens with list of Critical Work Activities (or experience statements) that must be acknowledged and documented. However, actual performance is assessed two ways:

1) by fulfilling these general experience and historical statements and 2) by an examiner administering *Skill Checks* (or performance assessments). Five successful Skill Check attempts are required. Skill Checks are clearly marked with the title - **CAR SKILL CHECK**. Candidate performance is documented by a ☑ on the Examiner's *CHECKLIST*. All Skill Checks must be co-signed and dated by the trainer/supervisor and candidate. Work Activity sign-offs must be co-initialed by the trainer/supervisor or manager and candidate then dated. If a particular Skill Check step or standard does not apply at your facility, check-off the applicable *NA* box and continue. Skill Checks may require the candidate to perform work a bit differently than your normal procedure or learn how to do something that may not be part of their typical day-to-day responsibilities. However, you may only check-off *NA* if the process-standard does not apply because the equipment or tooling is not available or the stamping process itself does not require this activity.

For additional information about administering *CAR* Skill Checks, see the <u>Guide to Administering Credentialing Achievement Records</u> or consult with your facility Credentialing Coordinator.

METAL STAMPING CREDENTIALING PROGRAM

LEVEL II CREDENTIALING ACHIEVEMENT RECORD (CAR)

Operate Equipment with Progressive Dies - Level II DUTY CLUSTER 2.9-10

Duty Cluster and Critical Work Activities	Date Completed	Supervisor Initials	Trainer Initials	Trainee Initials
Operate Equipment with Progressive Dies				
Candidate has successfully completed all required safety training/courses as specified by the work facility or required by OHSA. Candidate has working knowledge of applicable OHSA and ANSI regulations and guidelines.				
Candidate has successfully completed the probationary period for this position as specified by the work facility.				
Candidate demonstrated the ability to recognize and explain the type of press and its function (including controls, mechanical devices, die components, and auxiliaries).				
Candidate has demonstrated working knowledge of material/part conformance standards and basic SPC recording techniques.				
Candidate has met the attendance policy of the facility for the last 12 consecutive months.				
Candidate has no company documented safety violations within the last 12 consecutive months.				
Candidate was able to recognize common equipment problems and adverse material conditions.				
Candidate has no reported incidents of non-conforming parts contaminating quality parts over the last three (3) consecutive months.				
Candidate has demonstrated the ability to maintain a clean and orderly work area in compliance with facility housekeeping policies and has no reported violations for a period of three (3) consecutive months.				
Candidate has basic industry knowledge of stamping operations and die technology such as coining, embossing, forming, blanking, piercing, and/or drawing.				

CAR SKILL CHECK

Candidate: Registration No.:	Date:	199
Examiner: Examiner No.:	(For examiner use after all Skill Ch Results (check one): Pass	•

Work Activity

2.9-2.10 - Operate Equipment with Progressive Dies

Performance Conditions

Setting: OJT Observations - Shop/plant floor equipped with a sensored or nonsensored progressive die system. Given a setup in production using progressive dies that have already been verified for safety (including auxiliaries), produce parts according to a Process/Quality Plan. Candidate will start equipment, inch/jog machine, verify and document first part conformance, produce parts while continuously monitoring equipment, and shut-down equipment. Candidate is not responsible for major troubleshooting. However, candidate must be able to recognize adverse conditions, equipment problems, and nonconformance situations and respond accordingly. Processes and standards presented in this Skill Check are applicable to all required attempts.

(5 Skill Checks required).

Note:

If running a coil fed operation, candidate must also complete Skill Check b - Operate Auxiliary Equipment to be credentialed in this Duty Cluster.

Safety **Equipment:**

PPE/PPC

Tools, Equipment and Materials:

- Part Placement Equipment
- Die Bar
- Probe
- Stone
- Mirror/Flashlight
- Blow Gun/Vacuum
- Attribute and Fixture Gages
- Pen/Pencils (calculator optional)
- Process/Quality Plan
- Lubrication Devices (if needed)
- Lubricants/Coolants (as needed)
- Scrap and Part Containers

Measuring Instruments:

- **Calipers**
- Micrometers
- Scales/Tape Measure
- Specialty Gages
- **Protractor**

Attainment Standards

- 1. 100% of all procedural steps and standards, without assistance, within company-specific time limit, following all safety and plant procedures.
- 2. 100% conformance with all product standards and Process Plan criteria.

Trainee Directions

The above referenced tools, equipment, materials and supplies may be used to Operate Equipment with Sensored or Non-Sensored Progressive Die Sets. All safety and plant procedures must be followed. Both the process and final result of the process will be evaluated by the examiner. Steps should be performed in the sequence, and all steps must meet the standards for successful completion.

Examiner Instructions

For successful completion of this Skill Check, the candidate must demonstrate the ability to successfully complete the work activity under controlled assessment conditions. All work must be completed to standard. Before administering the Skill Check:

- ◆ Read/review the *Guide to Administering Credentialing Achievement Records* developed for the program.
- ♦ Ensure that you have a copy of this Skill Check for the candidate to use while he/she is working. Be sure all applicable equipment and supplies are available.

Do <u>not</u> provide assistance during the Skill Check. Monitor work in-progress and evaluate for *process*. Assess the completed work for conformance with **product** criteria. Mark *NA* if a process/product is not appropriate.

Stop the Skill Check immediately if the candidate violates a safety regulation or procedure or if there is any possibility of personal injury or damage to equipment.

Before testing, the examiner may discuss appropriate safety requirements and loss potential issues (i.e., Lockout/Tagout and HAZCOM/HAZMAT, personal protection equipment, pinch points, compressed fluid/air, high voltage).

EXAMINER: Read aloud the Skill Check Script from the Guide to Administering Credentialing Achievement Records (verbatim).

When the candidate indicates that he/she has completed the Skill Check or when maximum time allowed has run out, assess final product and follow the closing procedures outlined in the *Guide to Administering Credentialing Achievement Records*.

Checklist

Scoring Procedures: Observe the candidate's performance for each Process Element and mark the *CHECKLIST* whether or not the standards were attained (*Do not rely on your memory*). Steps on the process side are to be marked as they are initiated. Standards are to be marked after each step has been competed.

(C) *Critical*. Failure to meet the standard will result in Skill Check termination.

Note: The evaluator will terminate the assessment and schedule the individual for further training.

Examiner's CHECKLIST — CAR SKILL CHECK #1

Operate Equipment with Progressive Die Sets

Process Elements			Elements Process-Product Standards			
Steps	Yes	No		Yes	No	NA
⇒ Progressive Dies						
1. Inspect Work			PPE/PPC appropriate for job. (c)			
Site and Prepare			Process/Quality Plan obtained and understood.			
Stations			• Status of stock, press, auxiliaries, and part/scrap containers checked for availability and/or function.			_
			 Work area clean and free of debris and obstructions. 			
			Dies, fixtures, clamps, and progression stations			
			checked for function.			
			• Safety systems checked (guards secure/active, control			
			lights functional, alarms operational, etc.). (c) Tools/equipment staged for production; inspection			
			gage tags checked for calibration.			_

2.9-21.0 - CAR SKILL CHECK SUMMARY

Critical Work Activities and Skill Checks Completed	Date Completed
Operate Equipment with Progressive Dies	
Successful Skill Check Attempt #1a	
Successful Skill Check Attempt #2a	
Successful Skill Check Attempt #3a	
Successful Skill Check Attempt #4a	
Successful Skill Check Attempt #5a	

Skill Check 1b - Operate Auxiliary Equipment (Coil-Fed)

DUTY CLUSTER 2.1-2.6

Critical Work Activities & Experience	Date Completed	Supervisor Initials	Trainer Initials	Trainee Initials
Auxiliary Orientation and Walkthrough				
Operate Auxiliary Equipment				
Candidate demonstrated ability to recognize and explain the function of equipment used in material feed (manual feed and coil fed), payout, and part/scrap removal.				
Candidate has no company documented safety violations within the last 12 consecutive months.				
Candidate has consistently been able to meet the requirements pertaining to auxiliary equipment as specified in Process/Quality Plans and supportive Standard Operating Procedures or operations/equipment manuals.				
Candidate able to recognize common adverse material conditions (i.e., camber, crowning, edge roll, cross-bow, coil break, rust, surface lamination, etc.).				

Skill Checks begin on next page

CAR SKILL CHECK "b"

Candidate: Registration No.:	Date: 199
Examiner: Examiner No.:	(For examiner use after all Skill Check have been administered) Results (check one): Pass Yes No

Work Activity

2.1-2.6 - Reload, Adjust and Operate Coil-Fed Auxiliaries

Performance Conditions

Setting:

OJT Observation b - **Reload a Coil**. Candidate will obtain tools/equipment and materials; reload raw material into production (Note: The previous coil/strip has already been taken out of the feeder and die), and operate auxiliaries (includes: adjust uncoiler/feeder, straightener, stock reel/cradle, take-ups, and payouts/unloaders). Processes and standards presented in this Skill Check are applicable to all required attempts. (5 Skill Checks required).

Safety Equipment:

PPE/PPC

Tools, Equipment and Materials:

- Common Hand Tools
- Wrenches (Hex, Adjustable, Box and Open-ended)
- Flashlight
- Mirror
- Locking pliers
- Die bar
- Screw driver set
- Calculator
- Part Placement Devices

- Crane or Forklift (if needed)
- Stock (blanks, coil, or strip)
- Process/Quality Plan

Measuring Instruments:

- Ruler/Tape Measure
- Micrometers
- Calipers
- Square

Attainment Standards

- 1. 100% of all procedural steps and standards, without assistance, within company-specific time limits, following all safety and plant procedures.
- 2. 100% conformance with product standards and Process Plan criteria.

Trainee Directions

The above referenced tools, equipment, materials and supplies may be used to Operate and Adjust Auxiliary Equipment. All safety and plant procedures must be followed. Both the process and the final results of the process will be evaluated by the examiner. Steps should be performed in the sequence, and all steps must meet the standards for successful completion.

Examiner Instructions

For successful completion of this Skill Check, the candidate must demonstrate the ability to successfully complete the work activity under controlled assessment conditions. All work must be completed to standard. Before administering the Skill Check:

- ♦ Read/review the *Guide to Administering Credentialing Achievement Records* developed for the program.
- Ensure that you have a copy of this Skill Check for the candidate to use while he/she is working and be sure that all applicable equipment and supplies are available.

Do <u>not</u> provide assistance during the Skill Check. Monitor work in-progress and evaluate for *process*. Assess the completed work for conformance with **product** criteria. Mark *NA* if a process/product is not appropriate.

Stop the Skill Check immediately if the candidate violates a safety regulation or procedure or if there is any possibility of personal injury or damage to equipment.

Before testing, the examiner may discuss appropriate safety requirements and loss potential issues (i.e., Lock and Tag, crane/forklift safety, personal protection equipment, confined space entry, compressed air, high voltage, E-Stops, etc.).

EXAMINER: Read aloud the Skill Check Script from the *Guide to Administering Credentialing Achievement Records (verbatim)*.

When the candidate indicates that he/she has completed the Skill Check or when maximum time allowed has run out, assess the final product and follow closing procedures outlined in the *Guide to Administering Credentialing Achievement Records*.

Checklist

Scoring Procedures: Observe the candidate's performance for each Process Element and mark the *CHECKLIST* whether or not the standards were attained (*Do not rely on your memory*). Steps on the process side are to be marked as they are initiated. Standards are marked after each process step has been completed.

(C) *Critical*. Failure to meet the standard will result in Skill Check termination.

Note: The evaluator will terminate the assessment and schedule the individual for further training.

Examiner's CHECKLIST — CAR SKILL CHECK #1b Reload, Adjust and Operate Coil-Fed Auxiliaries

Process Elements	Process Product Standards

_									
RE-LOAD									
\Rightarrow UNCOILER	Yes	No		Yes	No	NA			
Request Raw Material Delivery			Donned/wearing required PPE (c).Followed job Process/Quality Plan.	0		0
